HOMER INDEX NEWSPAPER
HOMER, MICHIGAN
WED 15 APR 1885

Married. At the residence of the brides parents on Adams Street on Wednesday evening last by Rev. P. J. Maverty, Mr. Will O. Clark and Miss Lillian E. Kirby.

Further on in the same issue this appeared:

Will O. Clark, who pulls the stroke scoop in the Corner Grocery, took a trip up the west end of town April 3, 1885, executed the papers for a life partnership with Miss Lillian E. Kirby, of this village and the twain have settled right down to house-keeping in Will's new home as natural as life. Like a sensible fellow he keeps right on selling sugar and tea just as if he was not the happiest man in America.

From your editor Valerie. Lillian Kirby's mother Anna (Peppet) Kirby was a sister to George Peppet who was my Great Grandfather. I believe that later they may have moved to Coldwater, KS. (I have to research this) anyone out there know?

UPDATE

Julia Miller is now nearing the end of the N's, recording the obituaries from Albion, MI newspapers for the Local History Room at the Albion Public Library. She says it is interesting finding out who is related to whom.

Program stresses family preservation

On Jan. 20, Michigan's 133 birthing hospitals began offering the service of paternity establishment to unwed parents as a part of the birth registration process.

It is the result of legislation passed last year as part of Gov. John Engler's welfare reform initiative to "To Strengthen Michigan Families."

By establishing paternity, the biological father becomes the legal father, a procedure considered crucial to furnishing long-term stability for a child.

Michigan has long been a leading state in establishing paternity and has also taken the lead in developing this procedure. About 88 of the birthing hospitals had been involved in paternity establishment at birth in the past.

Immediate establishment of paternity provides both the child and parents with many benefits. The child has an established emotional and financial relationship with both parents; the father's name can be entered on the birth certificate; and the child has access to its medical history, inheritance rights, insurance, social security, veteran's and other benefits.

The benefits to the parents include the involvement of the father and the development of a sense of personal responsibility for their child; the father's name appears on the certificate; the mother receives emotional and financial support; and it is less expensive, more convenient and less traumatic than a court proceeding.

The legislation (Public Acts 115 and 116 of 1993) is significant

considering that 36 percent (52,000) of all births in Michigan in 1992 were to single women, and it will make the process of establishing paternity consistent in all hospitals.

Hospitals will provide all unwed parents with an affidavit to voluntarily acknowledge paternity along with information on their rights and responsibilities. The hospital will forward the completed affidavit to the probate court and also to the local registrar's office along with the birth certificate.

Hospitals have been provided training in the procedure by the Departments of Public Health and Social Services.

DSS is currently involved with informing the public of the importance of establishing paternity and about this procedure.

CALCULATING BIRTH DATES FROM TOMBSTONES

by Clyde Allen Chamberlin

Tombstone reads: John Doe died Nov 25, 1991; aged 86ys 3mo 9da. To calculate a birthdate, subtract 86ys 3mo 9da from Nov 25, 1991: 1991-11-25 minus 86-03-09 equals 1905-08-16 (August 16, 1905) birthdate. Proof: 1905-08-16 + 86-03-09 = 1991-11-25 (November 25, 1991) death date.

Tombstone reads: John Doe died March 20, 1991, aged 85ys 4mo and 10da. This is slightly more difficult. 1991-03-20 minus 85-04-10. Borrow 12 months (1 year) from 1991. 1990-15-20 minus 85-04-10 is 1905-11-10 (November 10, 1905) birthdate. Proof: 1905-11-10 + 85-04-10 equals 1990-15-20; as there aren't 15 months in a year, subtract 12 months to put back into the year column. You now have 1991-03-20 (March 20, 1991) tombstone death date.

Slightly more complex...Tombstone reads: John Doe died March 10, 1991, aged 85ys 6mo 20da. 1991-03-10 minus 85-06-20. You'll need to borrow twice this time since you cannot subtract 20 from 10 nor 06 from 03. Borrow 1 month (30 days) from the month column and 1 year (12 months) from the year column. It now reads 1990-14-40 minus 85-06-20 = 1905-08-20 for birthdate. Proof: 1905-09-20 plus 85-06-20 equals 1990-15-40. As there aren't 40 days in a month, put 30 days (1 month) back into the month column. As there aren't 15 months in a year, put 12 months (1 year) back into the year column. It now reads 1991-03-10, tombstone death date March 10, 1991.

Complicated...Tombstone reads: John Doe died September 16, 1900, aged 85ys 2mo 16da. 1900-09-16 = 1815-07-00. You can't write a date 07-00-1815, so let's borrow 30 days from 1900-09-16 and have it read 1900-08-46. Subtracting 85yr 2mo 16da = 1815-06-30 (June 30, 1815). Proof: 1815-06-30 + 85-2-16 = 1900-08-46 which becomes 1900-09-16 (Sep 16, 1900).

Always work the problem backwards to prove your solution before writing the information down on genealogical charts, family group sheets, etc. This helps avoid errors in family history records.
